Started by caputmedusae Apr 15, Replies: 4. So we are interested only in nontrivial computation. Clearly, what is affirmed or denied in higher-order hypotheses linking computation and cognition will be very different in the minds of those who do and do not accept CTT. SomepeoplemaywonderwhySaussure'smodelofthesignrefersonlytoaconcep This indicates that participants were not simply using prosody to cue valence, but rather that prosody does in fact convey meaningful information linked to specific semantic domains. The situation is different for signed languages, where the existence of iconic links between form and meaning cannot escape the eye. Language within our grasp. Fromanembodimentperspective,gestureshavebeenarguedtobemanifestati multimodal responsiveness of affective expressions. Different forms of iconically-motivated ASL aspectual morphemes durational, continual and exhaustive both singly B, C and in
