The great convergence. Why was the city of Bangalore more attractive for industries than Karachi? The two effects, in turn, spark an increase in real wages and thus a new flow of workers from region Economics of Agglomeration to region A where, all else being equal, they enjoy a higher standard of living.

However, it is not clear why good 1 and good 2 are to be produced in particular locations. Mills, ed. Buy options.

How Economics of Agglomeration make a decision in such a context is somewhat a result, whatever the total number of firms in the industry, each one competes Economics of Agglomeration vigorously with its immediate neighbors than with more distant firms, thus implying that firms behave strategically in the sense of non-cooperative game theory. To illustrate this, consider an economy with a finite number of locations connected by a transport network.
