The resulting elastomer is thermoplastic, and it is possible to reprocess it by simply heating it to above the glass transition temperature of polystyrene. Provides a unique platform to explore the complex engineering requirements of designing assistive technologies that must be relied upon in unpredictable environments.

Defect structures are important to performance and therefore inspection. I Jud, H. Lahiri, and A.

The inclusion of hollow glass fibres into a composite system was shown by Jang. In the second process, the siloxanes were also encapsulated and dispersed in the coating matrix.
