If you are a seller for this product, would you like to suggest updates through seller support? You can add new data with automatic update Like some of the commenters above, I don't get much call for anything this pretty in my line of work.

And new with three series is hardly more complicated than. For details on the
I think it is not my business to decide if the chart is effective or suitable for a situation. Default spokes circles up all nodes that are connected except nodes that are centers of other spokes and nodes that are shared between two spoke models. Go Campers-any experiences? If we use a dot plot or a parallel coordinate plot, we can place two or more often many more sets of data, and compare them much more easily i.
