The proposed approach is based on the revision of standard mathematical programming optimization models of classical aggregate plan with environmental and social factors. Definitive Guide Video Bundle. Hiring cost includes training costs for workers and social security payments at the initial step.

When the service level decreases, social cost decreases since smaller workforce. New Hardcover Quantity Available: 2. In particular, a supply process receives certain inputs that are then turned into desired outputs via a transformational process to satisfy the demand. They observe the trade-offs between system costs and GHG emission for the system under consideration. Conceptual models are provided to depict the influence of industry. General unit cost of CO₂ is known [26] and the cost of GHG emissions per product can be estimated by multiplying the amount of CO₂ when producing one product.
